## Code of Sustainability

As a distributor of natural and vegan cosmetics, we are fully aware of our responsibility towards the environment and sustainability. Therefore, we are committed to an environmental code of conduct that will guide our daily activities. We will actively work to minimize our negative impact on the environment and implement measures to promote sustainable practices. Our company will strive to use as much recycled packaging as possible and reduce the use of plastics to minimize our environmental footprint. We will continually look for new ways to reduce our environmental footprint and take an active role in protecting nature for future generations. Our goals are clear: to protect the environment and promote sustainability in all aspects of our business.

Sincerely,

---
