Safe ingredients and no testing on animals

As a distributor of natural and vegan cosmetics, we are committed to creating and adhering to a safe ingredient and manufacturing code that will be the foundation of our business. We will ensure that all ingredients used in the manufacture of the products we sell are safe and meet the highest standards of quality and safety. We will carefully monitor suppliers and their supply chain to ensure that all raw materials are ethically and sustainably sourced and obtained in a way that does not harm the environment or animals.

We will also require that all our products undergo alternative testing methods that do not involve animal testing. We will only work with manufacturers who share our values and principles regarding the ethical treatment of animals and will adhere to our safe raw material and manufacturing code.

Our goal is to provide our customers with safe and quality products that are consistent with our values and principles of sustainability and ethics. We will continually work to improve our practices and processes to ensure that our cosmetic products are not only environmentally friendly, but also safe and effective for our customers.

Sincerely,

Date :

16st April 2024
